Chapter 1: Fire and Nonnative Invasive Plants—Introduction	1	Woody Plant Invasions.....	42
by Jane Kapler Smith		Preventing or Mitigating Altered Fire Regimes	44
Kristin Zouhar		Summary Recommendations	45
Steve Sutherland		Chapter 4: Use of Fire to Manage Populations of Nonnative Invasive Plants	47
Matthew L. Brooks		by Peter M. Rice	
Scope of This Volume.....	2	Jane Kapler Smith	
Fire Behavior and Fire Regimes	3	Introduction.....	47
Organization and Use of This Volume.....	5	Use of Fire Alone to Control Nonnative Invasive Plants.....	48
Chapter 2: Effects of Fire on Nonnative Invasive Plants and Invasibility of Wildland Ecosystems	7	Prevention of Reproduction by Seed	48
by Kristin Zouhar		Induced Mortality and Prevention or Delay of Resprouting.....	51
Jane Kapler Smith		Burning to Favor Native Species.....	52
Steve Sutherland		Fire Combined with Other Treatments.....	53
Invasion Ecology	7	Treatments that Increase Effectiveness of Prescribed Fire	53
Ecosystem Properties and Resource Availability	8	Prescribed Fire to Enhance Efficacy of Other Treatments	54
Properties of Native and Nonnative Plants	8	Altering Fire Severity, Uniformity, Extent, and Frequency to Control Nonnative Invasive plants	56
Nonnative Propagule Pressure	9	Prescribed Fire Severity and Uniformity in Relation to Season.....	56
Influence of Fire on Invasions.....	9	Prescribed Fire Severity and Uniformity in Relation to Fuel Beds.....	57
Influence of Fire on Resource Availability and Interactions Between Plant Species.....	10	Extent and Uniformity of Burns	58
Influence of Fire Severity on Postfire Invasions.....	12	Fire Frequency	58
Influence of Fire Frequency on Postfire Invasions.....	17	Management of a Human Process: Constraints on Use of Prescribed Fire.....	59
Influence of Spatial Extent and Uniformity of Fire on Postfire Invasions.....	18	Conclusions	60
Influence of Fire Season and Plant Phenology on Postfire Invasions.....	18	Chapter 5: Fire and Nonnative Invasive Plants in the Northeast Bioregion	61
Influence of Weather Patterns on Postfire Invasions.....	19	by Alison C. Dibble	
Generalizations About Fire Effects on Nonnative Invasives.....	19	Kristin Zouhar	
Question 1. Does Fire Generally Favor Nonnatives Over Natives?	20	Jane Kapler Smith	
Question 2. Do Invasions Increase With Increasing Fire Severity?	22	Introduction.....	61
Question 3. Does Additional Disturbance Favor Invasions?.....	22	Fire History in the Northeast Bioregion	61
Question 4. Do Invasions Become Less Severe With Increasing Time After Fire?.....	25	Nonnative Plants in the Northeast Bioregion	62
Question 5. Do Invasions Increase With Disruption of the Presettlement Fire Regime?	27	Interactions of Fire and Invasive Plants in the Northeast Bioregion	63
Question 6. Are Postfire Invasions Less Common in High Elevation Ecosystems?	28	Forests.....	66
Conclusions	28	Deciduous and Mixed Forests	66
Variation	29	Background	66
Changing Atmosphere and Climate	29	Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions in Deciduous and Mixed Forests.....	68
Management in a Changing World.....	31	Effects of Nonnative Plant Invasions on Fuel Characteristics and Fire Regimes in Deciduous and Mixed Forests.....	74
Chapter 3: Plant Invasions and Fire Regimes	33	Use of Fire for Controlling Nonnative Invasives in Deciduous and Mixed Forests.....	75
by Matthew L. Brooks		Coniferous Forests	76
Fire Behavior and Fire Regimes.....	33	Background.....	76
Biological and Physical Factors that Affect Fire Regimes.....	34	Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions in Coniferous Forests	77
Effects of Plant Invasions on Fuels	35	Effects of Nonnative Plant Invasions on Fuel Characteristics and Fire Regimes in Coniferous Forests.....	78
The Invasive Plant Fire Regime Cycle.....	37		
Predicting the Effects of Plant Invasions on Fire Regimes	38		
Herbaceous Plant Invasions	39		

	Page		Page
Use of Fire to Control Nonnative Invasive Plants in Coniferous Forests.....	78	Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions in Woodlands.....	105
Grasslands and Early-Successional Old Fields.....	78	Effects of Plant Invasions on Fuel and Fire Regime Characteristics in Woodlands	106
Background.....	78	Use of Fire to Manage Invasive Plants in Oak-Hickory Woodland	106
Role of Fire and Fire Exclusion in Promoting Nonnative Invasives in Grasslands and Old Fields.....	79	Tropical Hardwood Forest Habitat.....	107
Effects of Nonnative Plant Invasions on Fuel Characteristics and Fire Regimes in Grasslands and Old Fields.....	80	Background.....	107
Use of Fire to Control Nonnative Invasive Plants in Grasslands and Old Fields.....	81	Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions in Tropical Hardwood Forest.....	107
Riparian and Wetland Communities.....	82	Cypress Swamp Habitat.....	108
Background.....	82	Conclusions and Summary.....	109
Role of Fire and Fire Exclusion in Promoting Nonnative Invasives in Riparian and Wetland Communities	84	Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions.....	109
Effects of Nonnative Plant Invasions on Fuel Characteristics and Fire Regimes in Riparian and Wetland Communities	85	Effects of Plant Invasions on Fuel and Fire Regime Characteristics.....	110
Use of Fire to Control Nonnative Invasive Plants in Riparian and Wetland Communities.....	86	Use of Fire to Manage Invasive Plants	110
Emerging Issues in the Northeast Bioregion.....	87	Additional Research Needs.....	110
Fuel Properties of Invaded Northeastern Plant Communities and Influences on Fire Regimes	87	Emerging Issues	111
Vulnerability of Forest Gaps to Invasion	87		
Global Climate Change.....	88	Chapter 7: Fire and Nonnative Invasive Plants in the Central Bioregion.....	113
Interactions Between Nonnative Invasive Plants, Fire, and Animals	88	by James B. Grace	
Conclusions.....	88	Kristin Zouhar	
Resources Useful to Managers in the Northeast Bioregion	89	Introduction.....	113
		Geographic Context and Chapter Organization.....	114
Chapter 6: Fire and Nonnative Invasive Plants in the Southeast Bioregion.....	91	Fire Regimes.....	115
by Randall Stocker		The Conservation Context	115
Karen V. S. Hupp		Overview of Nonnative Plants that Impact or Threaten the Central Bioregion	115
Introduction.....	91	Plant-Fire Interactions.....	117
Fire in the Southeast Bioregion.....	92	The Mesic Tallgrass Prairie Subregion	117
Fire and Invasive Plants in the Southeast Bioregion.....	93	Northern and Central Tallgrass Prairie Formation....	119
Wet Grassland Habitat	94	Southern Tallgrass Prairie Formation.....	125
Background.....	94	The Great Plains Subregion	130
Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions in Wet Grasslands	96	Northern Mixedgrass Prairie Formation	131
Effects of Plant Invasions on Fuel and Fire Regime Characteristics in Wet Grasslands.....	97	Southern Mixedgrass Prairie Formation.....	136
Use of Fire to Manage Invasive Plants in Wet Grasslands.....	98	Shortgrass Steppe Formation	136
Pine and Pine Savanna Habitat.....	100	Riparian Formation.....	137
Background.....	100	Conclusions	140
Role of Fire and Fire Exclusion in Promoting Nonnative Plant Invasions in Pine and Pine Savanna.....	101		
Effects of Plant Invasions on Fuel and Fire Regime Characteristics in Pine and Pine Savanna.....	102	Chapter 8: Fire and Nonnative Invasive Plants in the Interior West Bioregion	141
Use of Fire to Manage Invasive Plants in Pine and Pine Savanna.....	104	by Peter M. Rice	
Oak-Hickory Woodland Habitat	105	Guy R. McPherson	
Background.....	105	Lisa J. Rew	
		Introduction.....	141
		Grasslands	145
		Desert Grasslands	145
		Mountain Grasslands	145
		Effects of Fire and Fire Exclusion on Nonnative Plant Invasions in Interior West Grasslands	146
		Effects of Nonnative Plant Invasions on Fuels and Fire Regimes in Interior West Grasslands	148
		Use of Fire to Manage Invasive Plants in Interior West Grasslands.....	152
		Shrublands	154
		Sagebrush Shrublands.....	154
		Desert Shrublands and Shrubsteppe.....	155
