Forest Service Specifications for Construction of Roads & Bridges

Preface

The Forest Service, U.S. Department of Agriculture, developed this book for use in the preparation and administration of contracts for the construction of roads and bridges on the National Forest Development Road System under Public Works Contracts, or as a condition of Timber Sale Contracts.

This book contains the Standard Specifications that commonly apply in Public Works and Timber Sale Contracts. When designated in a Forest Service contract, the specifications in this book are binding on the parties signing the contract and become a part of the contract. Provisions and clauses pertinent to Public Works Contracts are located in the Federal Acquisition Regulation (FAR). Standard Provisions and Special Provisions for timber sale projects are located in the Timber Sale Contract, Divisions B (BT) and C (CT) respectively. Conditions and requirements peculiar to individual projects, including additions and revisions to Standard Specifications, are located in the SPECIAL PROJECT SPECIFICATIONS section of the Contract.

In the development of this book, some section numbers were not utilized. The section numbers that are not included in this book may be used when it is necessary to develop a specification that is not adequately covered in one of the sections contained in this book, as long as it utilizes the same format and is included within the appropriate division.

This book is available to the public from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available from other U.S. Government bookstores located in various cities around the country, including: Atlanta, GA; Birmingham, AL; Boston, MA; Chicago, IL; Cleveland, OH; Columbus, OH; Dallas, TX; Denver, CO; Detroit, MI; Houston, TX; Jacksonville, FL; Kansas City, MO; Los Angeles, CA; Milwaukee, WI; New York, NY; Philadelphia, PA; Pittsburgh, PA; Portland, OR; Pueblo, CO; and San Francisco, CA.
