

Jobs and Income

Economic Contributions in 2016 At A Glance

Eastern Region 9

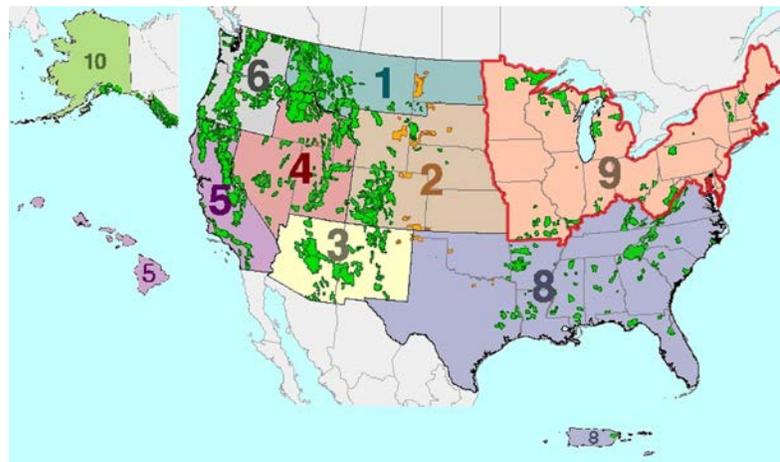

In 2016, the Eastern Region 9 supported:

- An estimated **26,880 jobs** (annual average of part time, full time, temporary and seasonal), and
- Around **\$1,322,639,000** of **labor income** in local communities.

(<https://www.fs.fed.us/emc/economics/index.shtml>)

How do the National Forests and Grasslands Contribute to Economies?

National Forests and Grasslands provide multiple benefits to the American people and to local communities. They provide clean air and water, preserve cultural resources, and conserve lands for the enjoyment of present and future generations.

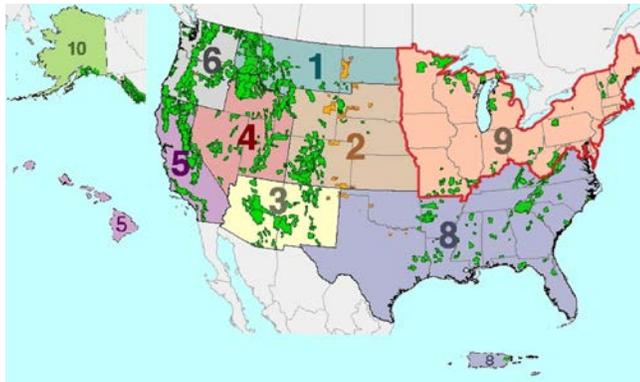

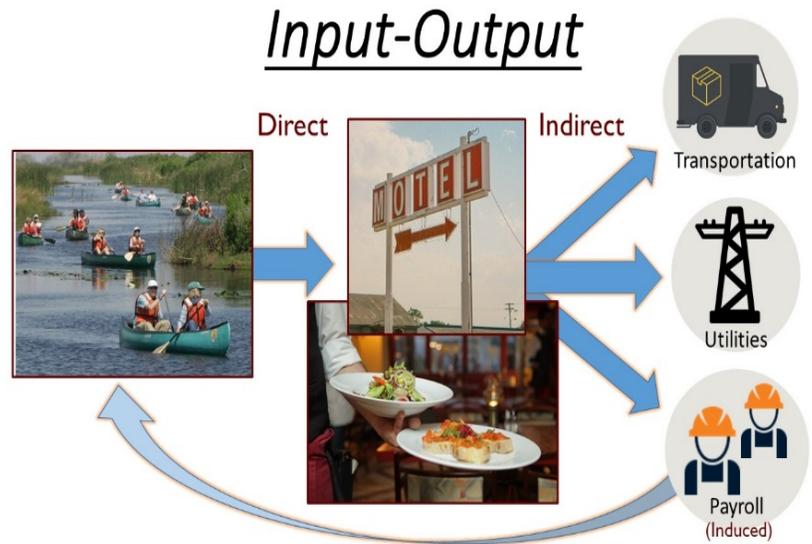

They also support local economies through recreation, timber, energy, minerals, and livestock grazing. In addition, counties with national forests or grasslands receive funds to support schools, road maintenance, and stewardship projects. The Forest Service also invests in such things as the construction and maintenance of infrastructure, environmental restoration, and forest health. In 2016, the sum of these activities on Forest Service lands in the Eastern Region 9 supported approximately 26,880 local jobs and \$1,322,639,000 in local labor income.

Why Report Jobs and Income?

Residents and local government officials in surrounding communities have interest in how management of the National Forests and Grasslands affect local economies.

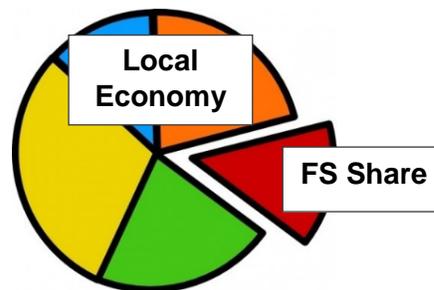

Analysis Methods: How a contribution analysis is constructed

1 A software and data package called [IMPLAN](http://www.implan.com) (www.implan.com) is used to characterize the structure of the local economy and how the different pieces of the economy interact (an "Input-Output" model).

2 Forest Service data for Program outputs from the Eastern Region 9 is added to the model: recreation (including fish and wildlife related), livestock grazing, forest products, energy, minerals, payments to states, and National Forest and Grassland budgets.

3 A model is built from this data which estimates the economic links between Forest Service natural resource management on Forest Service lands in the Eastern Region 9 and local jobs and income.

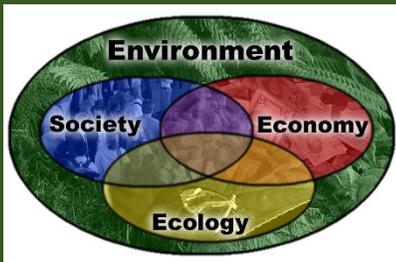

Resource Management Outputs from Forest Service Lands

National Forests and Grasslands are managed for multiple uses. Table 1 shows the Program outputs which were used to estimate the tie between management actions and economic activity in communities around Forest Service lands in the Eastern Region 9.

Table 1: Forest Service Resource Outputs by Program in the Eastern Region 9 during 2016
(for data sources, see page 8).

Program	Activity	Units of Measure	Output in 2016
Recreation	Wildlife and Fish - Locals	Visits	1,374,145
		Expenditures (Thousands of \$2016)	\$36,990
	Non-residents	Visits	598,803
		Expenditures (Thousands of \$2016)	\$106,358
	Downhill ski/snowboarding - Locals	Visits	515,381
		Expenditures (Thousands of \$2016)	\$18,165
	Non-residents	Visits	726,588
		Expenditures (Thousands of \$2016)	\$143,209
	All Other Rec Activities - Locals	Visits	6,032,179
		Expenditures (Thousands of \$2016)	\$98,695
	Non-residents	Visits	3,893,815
		Expenditures (Thousands of \$2016)	\$594,097
Grazing	Cattle, Horses, Sheep, Goats	AUMs	47,826
Timber	Sawtimber	CCF	220,236
	Fuelwood	CCF	31,803
	Pulp, Poles, All Other	CCF	506,268
Value of Minerals & Energy Produced	Energy (coal, oil, gas, geothermal)	(Thousands of \$2016)	\$2,203
	Minerals	(Thousands of \$2016)	\$161,430
Payments to States & Counties	25% fund, Secure Rural Schools, Royalties	(Thousands of \$2016)	\$14,144
	Payments in Lieu of Taxes	(Thousands of \$2016)	\$16,502

The counties selected to form a National Forest or Grassland's economic area of influence are chosen based on where FS management decisions have a direct effect on economic activity. This group of counties is also referred to as the "study area" or "impact area." The contributions of natural resource management on the National Forests and Grasslands ripple through the local economy, supporting jobs and income in many different sectors of the economy.

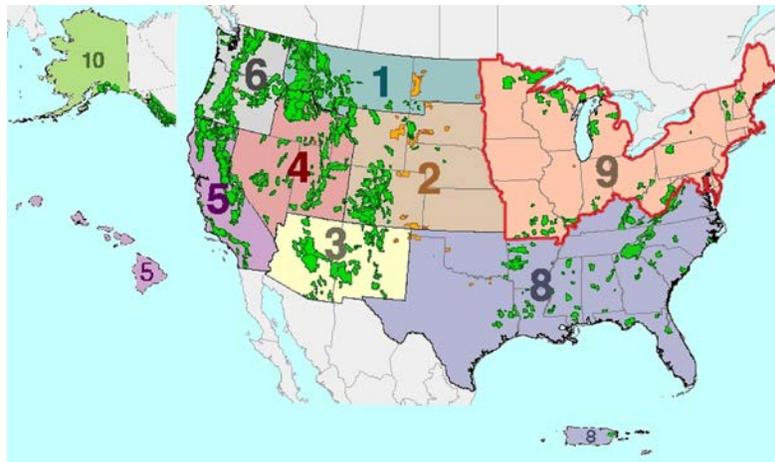

The values presented in this report are the best estimates to date, however they are subject to change as new data become available. The estimates for 2016 were last revised in June, 2018.

Economic Area of Influence

Economic areas of influence oftentimes differ by the resource under investigation, surrounding geography, and overall analysis objectives. The estimates in this report are generated for the areas around Forest Service lands in the Eastern Region 9 where direct Forest Service related expenditures occur. Other objectives, i.e. for forest planning, NEPA project analysis, etc. often focus on a different geography. On the map below, the area outlined in red shows where Forest Service related direct expenditures occur in the Eastern Region 9, including: recreation and wildlife visitor spending, the location of grazing permit holders, the location of logging and restoration firms, the location of mills processing FS wood products, the counties receiving returns to states funds and payments in lieu of taxes, the location of Forest Service budget expenditures, and the salary spending by Forest Service employees.

To avoid double counting, the results for individual forests and grasslands were not simply summed together to get FS Region or national contribution results.

Note: The presentation of data by Program (recreation, timber, etc.) provides a convenient way of displaying the economic contributions of Forest Service activities. It does not mean that the economic contributions can be fully attributed to individual program areas, nor that economic contributions can be compared across programs. Joint cost and joint production complicate programmatic comparisons. For example, an increase in timber harvest would support an increase in local economic contributions from logging and the forest products industry. However, there are associated effects such as fire mitigation, wildlife habitat restoration, recreation access, and so on that share production costs and are not individually captured in the calculation of economic contributions.

Job Contributions by Program

Jobs supported by the National Forests and Grasslands are often in small, rural communities and are therefore an important contribution to economic and social sustainability. Employment is the estimate of average annual full-time, part-time, temporary, and seasonal jobs. In 2016, the Eastern Region 9 supported an estimated 26,880 jobs in the local area. Direct job contributions come from economic activity associated with a Forest Service Program. Secondary job contributions are the ripples of economic activity stimulated by the direct economic activity. Total job contributions are the sum of direct and secondary contributions.

Table 2: Direct and Total jobs supported by the Eastern Region 9 in 2016.

Program	Direct Jobs (Avg Annual)	Total Jobs (Avg Annual)
Recreation by Local Visitors	1,330	2,120
Recreation by Non-Local Visitors	7,670	12,140
Minerals and Energy	90	260
Forest Products	2,040	5,060
Livestock Grazing	120	300
FS Resource Mgt Investments	3,620	6,250
Payments to States/Counties	430	760

The estimates for Recreation (including wildlife related), Minerals & Energy, Forest Products, and Livestock Grazing include the jobs supported by these programs in the private sector. Non-local recreation visitors bring new money into the economy. Local recreationists spend money that is already counted in the economic statistics for the area so they are tracked independently.

Forest Service Resource Management Investments capture the spending of National Forest or Grassland budgets on such things as infrastructure construction and maintenance, ecosystem restoration, fuels treatments, salaries, etc.

The Payments to States/Counties estimates the jobs supported by local government investment in such things as roads and schools via funding from programs like the 25% Fund, Payments in Lieu of Taxes and minerals royalties.

NOTE: What is a “job”? **One “job” does not always equal one person.** The job estimates reported here represent the average annual SUM of portions of jobs - part time, full time, seasonal and temporary – that are supported by management of Forest Service lands in the Eastern Region 9.

Keeping the Focus Local

Labor Income is directly associated with local jobs and business owners. Other measures of income such as Household Income and Total Income include things like investments, rents, and transfer payments that are not tied to Forest Service management decisions so they are not reported here.

As direct and secondary contributions ripple through the economy, Labor Income is supported in a wide variety of sectors not directly affected by resource management decisions.

Labor Income Contributions by Major Program

Labor income is the value of wages, salaries and benefits for wage earners plus income to local business owners. In 2016 Eastern Region 9 contributed an estimated \$1,322,639,000 in labor income to the local area, with 85% going to wages and benefits for local wage earners and 15% going to local business proprietors and partnerships.

Table 3: Direct and Total Labor Income supported by the Eastern Region 9 in 2016.

Program	Direct Labor Income (Annual 1,000 \$2016)	Total Labor Income (Annual 1,000 \$2016)
Recreation by Local Visitors	\$42,802	\$86,730
Recreation by Non-Local Visitors	\$242,276	\$491,868
Minerals and Energy	\$9,788	\$19,728
Forest Products	\$105,091	\$269,805
Livestock Grazing	\$242	\$6,681
FS Resource Mgt Investments	\$259,843	\$401,100
Payments to States/Counties	\$29,146	\$46,727

Job and Labor Income Contributions by Major Economic Sector

Jobs and labor income supported by the National Forests and Grasslands are spread across many local economic sectors. Note that sectors that have the highest employment may not generate the highest labor income and vice versa. Jobs and income are important, but there is an enormous range of other benefits from the national forests and grasslands.

Table 4: Total Jobs and Labor Income supported by the Eastern Region 9 in 2016 with local economic area of influence totals for context.

Major Economic Sector	FS Supported Jobs (Avg. annual)	FS Supported Labor Income (1,000 \$2016)	Area of Influence Jobs (Avg. annual)	Area of Influence Labor Income (1,000 \$2016)
Total	26,880	\$1,322,639	76,548,371	\$4,693,146,724
FS Percent of Area of Influence	0.0%	0.0%		
Accommodation & Food Servs	7,140	\$205,006	5,640,072	\$141,341,661
Admin, Waste Mgt & Rem Servs	1,040	\$41,047	4,441,663	\$181,491,232
Agriculture	1,720	\$55,689	1,098,926	\$31,389,046
Arts, Entertainment, and Rec	1,240	\$33,048	1,667,118	\$50,792,175
Construction	260	\$15,706	3,833,772	\$230,710,827
Educational Services	570	\$19,742	2,068,533	\$90,310,362
Finance & Insurance	650	\$59,913	4,150,127	\$391,261,007
Health Care & Social Assistance	1,500	\$88,135	9,572,040	\$561,814,974
Information	270	\$30,311	1,295,060	\$149,889,351
Local, State, & National Gov't	2,520	\$204,674	8,471,464	\$689,644,355
Manufacturing	1,580	\$109,954	5,769,185	\$461,402,483
Mining	170	\$13,661	230,786	\$13,111,991
Mgt of Companies	250	\$32,606	1,137,299	\$150,082,905
Other Services	1,020	\$46,109	4,976,928	\$216,031,595
Prof, Scientific, & Tech Services	1,850	\$137,088	6,068,732	\$562,321,378
Real Estate & Rental & Leasing	750	\$23,567	3,312,388	\$102,840,008
Retail Trade	2,800	\$88,569	2,709,317	\$151,909,769
Transportation & Warehousing	760	\$44,074	7,174,861	\$241,506,412
Utilities	80	\$11,308	244,287	\$37,340,222
Wholesale Trade	720	\$62,434	2,685,811	\$237,954,971
