

Nature's Benefits from Your National Forests

The mission of the USDA Forest Service is to sustain the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations.

The Agency's 154 national forests and 20 grasslands engage in quality land management that offers multi-use opportunities to meet the diverse needs of people. Forest ecosystems are human, plant, and animal life-support systems that provide a suite of goods and services vital to human health and

livelihood—essentially Nature's Benefits, also called Ecosystem Services. Benefits from healthy forest ecosystems include: water supply, filtration and regulation (flood control); habitat for native wildlife and plants; carbon sequestration; jobs, commerce, and value to local economies; recreational opportunities and open space for communities; increased physical and psychological wellness; cultural heritage; wood and other non-timber forest products; energy; clean air; and pollination.

Do You Know Which Nature's Benefits Come from the Cleveland National Forest?

Water: In drought-prone California, the quantity, quality, and timely provision of our water is dependent on the health of our national forests. The forests supply, filter, and regulate water from upper watersheds and meadows, providing clean water throughout the year to communities, homes, and wildland habitats. Water also helps support jobs and industries that are water-dependent.

- About 77,000 acre-feet of water per year come from the Cleveland National Forest¹
 - Or over 25 billion gallons per year

That equates to:

- Over 38,000 Olympic-size swimming pools
- Enough drinking water for California's population for more than 2 years², or
- Enough water for over 190,000 households for a year³

How much is 25 billion gallons worth?

- Estimated wholesale water market value: over \$11 million⁴
- Cost to Los Angeles households: over \$834 million⁵

²Per the National Health and Nutrition Examination Surveys, the average American consumes ~299 gallons/year of water, through both drink and food ³ Assuming 362 gallons/day - <http://www.irwd.com/images/pdf/save-water/CaSingleFamilyWaterUseEfficiencyStudyJune2011.pdf>

⁴Using CA water market prices, appropriated by sector - https://www.fs.fed.us/rm/value/docs/marginal_economic_value_streamflow_forests.pdf 5100 gallons/day + monthly water bill of ~\$100.14 - <http://www.circleofblue.org/waterpricing/>

Nature's Benefits

Cleveland National Forest

(Continued)

Carbon: The National Forests of California play an important role in parts of the climate cycle; acting as carbon storage and sequestration units. Forests retain carbon from being emitted to, and absorb carbon dioxide (CO₂) from, the atmosphere, which helps reduce the impacts of a warming climate to human, plant and animal habitats.

- The Cleveland National Forest stores about 0.90 Million Metric Tons (MMT) of Carbon in its forests, and ⁶
- Shrublands on the Cleveland National Forest, like chaparral, store about an additional 2.2 MMT of carbon⁷
- Also the Forest sequesters on average 0 MMTC annually; this equates to enough to drive around the earth 492 times.

Local Economies: The economy of California is fifth largest in the world, and California's National Forests contribute almost \$2.6 billion annually in wages and income to small businesses,⁸ a critical component of the rural economy of the state.

The Cleveland National Forest supports:

- About \$48.7 million annually in labor income for wage earners and local businesses⁹

- Including food and lodging services, arts, entertainment and recreation, real estate, rental and leasing, and retail trade services.
- About 870 jobs annually¹⁰

Recreation: The Cleveland National Forest provides a place for people to find open space, experience wildlife, recreate, relax, and otherwise remove themselves from the stressors of everyday life and urban sprawl.

Many methods exist to calculate the benefits from recreation and the value of those benefits to visitors and local economies. The following provide some estimations of those values:

- Over 641,000 people visit the Cleveland National Forest to recreate annually, which represents an economic value of about \$53 million to those visitors¹¹
- Visitors to the Cleveland National Forest spend about \$16 million during their trips¹²
- Visitors to the Cleveland National Forest contribute more than \$7.5 million towards wages and income of local businesses¹³

The Cleveland National Forest landscape includes diverse recreation opportunities such as water recreation (fishing, swimming, and rafting) as well as camping, picnicking, and green space for activities that support human wellness and cultural traditions.¹⁴

¹⁴Enterprise Data Warehouse

- 406 lakes and ponds
- 551 miles of rivers and streams
- 336 miles of trails
- 77,960 acres of wilderness
- 15 developed campgrounds
- 6 developed picnic areas

People visit their National Forests to engage in specific activities that provide value to them from their experiences as shown below:

- Over 315,000 people visit the Cleveland National Forest annually to hike and walk as their main activity, which represents an economic value of over \$27 million to those visitors.¹⁵
- Over 53,000 people visit the Cleveland National Forest annually to bicycle as their main activity, which represents an economic value of over \$4.7 million to those visitors.¹⁶
- Over 62,000 people visit the Cleveland National Forest annually to camp as their main activity, which represents an economic value of over \$5 million to those visitors.¹⁷

Habitat: Forest Habitats and Biodiversity are key to ecological function; a forest's daily function in turn allows all of Nature's Benefits, from water to recreation, to continue to be provided for humans to enjoy.

The Cleveland National Forest hosts a multitude of key habitats for animals and plants.

- 22 Threatened and Endangered Species can be found on the Cleveland National Forest that include: southern steelhead, arroyo toad, California gnatcatcher, Quino checkerspot butterfly, Slender-horned spineflower.¹⁸
