## 2002 Engineering Field Notes Article Award Winners

---

---

Thank you for voting for your favorite *Engineering Field Notes* (EFN) articles. Nominating the top three articles is one way to recognize the authors who wrote those articles.

It takes time and energy for busy engineers to write articles for *Engineering Field Notes*. We rely on our authors to share their time, knowledge, and experience. The articles continue to save the U.S. Department of Agriculture (USDA) Forest Service time and resources.

The following winning authors will receive cash awards for 2002 EFN articles:

**Andrew Orlemann** for “Supporting the Burned Area Emergency Response (BAER) Program with Remotely Sensed Imagery”

**Thomas L. Moore** for “Public Forest Service Roads: A ‘Service First’ Approach To Managing Our National Forests”

**Paul H. Greenfield** for “Satellite Remote Sensing for the 2002 Winter Olympics”

Congratulations to the winners and to the authors who contribute articles. For tips on how to submit your article to EFN, see the *Engineering Field Notes* Guidelines for Authors on inside front cover.
