
Bibliography of Publications from Washington Office Engineering and Service Centers

This bibliography contains information on publications and other materials produced by the Washington Office Engineering staff and its service centers. Arranged by series, the list includes the title, author or source, document number, and date of publication.

This issue lists material published since our last bibliography (*Engineering Field Notes*, Volume 34, July–December 2002). Copies of *Engineering Field Notes* and most Engineering Management Series documents can be obtained from the Washington Office Engineering staff or from the Forest Service Intranet at <http://fsweb.wo.fs.fed.us/eng/pubs/efn/efn.cont.htm>. Copies of reports, Tech Tips, videotapes, compact disks, and digital video disks can be obtained from the center listed as the source. A number of special reports sponsored by the Geospatial Executive Board and authored by Geospatial Advisory Committee teams are available through the Geospatial Services and Technology Center and the Remote Sensing Applications Center.

Publications

ENGINEERING MANAGEMENT SERIES AND OTHER PUBLICATIONS

The Engineering Management (EM) Series contains publications serving a purpose or reader and publications involving several disciplines that are applied to a specific problem.

ENGINEERING FIELD NOTES (EFN)

This publication, published every 6 months, provides a forum for the exchange of information among U.S. Department of Agriculture (USDA) Forest Service personnel. It contains the latest technical and administrative engineering information and ideas related to forestry.
