## 2003 Engineering Field Notes Article Award Nominations

---

**T**hank you to our authors and readers for helping us pioneer an electronic *Engineering Field Notes* in 2003. Authors discussed landslide computer modeling, wildland fire mapping, fish passage, online access to innovations in technology and development, packable trail bridges, fuel cell technology, and online mentoring. Once again, authors shared their knowledge, experience, and insight as USDA Forest Service engineers at all levels and from all regions.

Please select the top three articles for 2003. In this one-person, one-vote system, your vote counts. Tell us which articles you found the most informative, beneficial, and interesting; which articles helped your unit save money; and which articles helped you develop more effective ways of accomplishing your work.

Rate the articles from 1 (best) to 3 (third best). Note whether you believe an article has helped or will help the USDA Forest Service save money or resources. Follow the instructions on the electronic form to send your vote to EFN Editor Sandy Grimm. Please vote by Friday, August 6, 2004.

Remember to share your engineering expertise with the EFN audience. Project reports, papers prepared for professional meetings, and training handouts are all potential EFN articles.
