4.13 FOREST SERVICE IMPLEMENTATION OF INTERAGENCY FIRE PROGRAM MANAGEMENT (IFPM) AND FOREST SERVICE FIRE PROGRAM MANAGEMENT (FS-FPM)

On October 1, 2004 the Forest Service, in conjunction with the Department of Interior wildland agencies, implemented the Interagency Fire Program Management (IFPM) Standard and Guide. The intent of IFPM is to establish minimum qualification standards for 13 key fire management positions to ensure a minimum level of NWCG qualifications, specialized experience, and training was required for each position. All Fire and Aviation Management employees that occupy one of the IFPM positions were required to meet all of the position standards as of October 1, 2010 and thereafter.

In 2008, the Forest Service created an agency addendum to IFPM called Forest Service Fire Program Management (FS-FPM) to establish the minimum qualification standards for key fire management positions that were subordinate to one of the IFPM positions, or were located on a subunit (i.e. Ranger District). The implementation period for FS-FPM concluded on October 1, 2013, and all Fire and Aviation Management employees that occupy one of the FS-FPM positions were required to meet the position standards on that date and thereafter.

The following Exhibit is a summary of all the IFPM and FS-FPM fire and aviation management positions recognized by the Forest Service.

4.14 FOREST SERVICE FIRE AND AVIATION MANAGEMENT (FAM) DUTY OFFICER (DO) STANDARD

Each Forest or Grassland Fire Management Officer or Assistant Fire Management Officer will perform the duties of a Fire and Aviation Management (FAM) Duty Officer (DO) for their unit, or will provide a delegated DO, during any periods of predicted or actual incident activity.

Individuals performing as DO must meet the minimum NWCG qualification consistent with the Forest/Grassland’s IFPM complexity rating and must also have the approval of the unit’s Agency Administrator.

NWCG Qualification Requirements for Duty Officers are as follows:

### MINIMUM QUALIFICATION STANDARDS FOR DUTY OFFICERS

A written delegation of authority from the Agency Administrator is recommended as it represents a vital link between fire operations and the line officer.

The required duties for all DOs are:

- Serve as the unit’s primary contact with Dispatch for both on and off-unit assignments.
- Monitor unit incident activity for compliance with Forest Service risk management practices.
- Coordinate and set priorities for unit suppression actions and resource allocation.
- Keep Agency Administrators, suppression resources, and information officers informed of the current and expected situation.
- Plan for and implement actions required for future needs.
- Document key decisions and actions.
DOs will perform the above duties in addition to any unit specific duties assigned by the unit’s Agency Administrators or fire managers through a delegation of authority or unit operating plan. In the event that the DO is required to accept an incident assignment, the outgoing DO must transition with another qualified and approved DO.

Use of District/Zone DOs is intended to manage span of control. When assigned to the DO role, DOs will not concurrently perform any ICS command or operational functions directly connected to an incident.

DO staffing levels may vary based on locally determined metrics such as fire danger, local area Planning Level, predicted incident activity, prescribed fire implementation, and/or span of control (see table below).

Activation Requirements for Duty Officers are as follows:
