

## AIRCRAFT AND PILOT CARDING

Every aircraft and pilot used in support of a Federal wildland fire mission must have a current Aircraft or pilot Card. The card must be held in the aircraft or with the pilot, and give specific authorization to do the mission being requested.

- These missions could be all, one, or any number of, missions as follows:
  - Air attack (Level I, Level II, Level III)
  - Reconnaissance
  - Fire surveillance
  - Water bucket
  - Helitorch
  - Cargo
  - Longline
  - Others
  
- Every pilot who flies a properly carded aircraft must possess a current Interagency Airplane or Helicopter Pilot Qualification Card that gives specific authorization to fly the type of mission being requested and for the specific type of aircraft being used for the mission. These missions could be all, or any number of, missions as follows:
  - Air attack
  - Reconnaissance
  - Fire surveillance
  - Low-level
  - Paracargo
  - Mountain/Remote airstrips
  - Smokejumper
  - Longline
  - Others
  
- Before the aircraft and pilot can be used for a specific mission, the aircraft must be specifically listed on a valid and current contract for the type of work being performed.
  
- A copy of the contract must be onboard the aircraft.
  
- Each user of the aircraft and pilot has the authorization to physically inspect the Aircraft Data Card, the Interagency Airplane or Helicopter Pilot Qualification Card, and the contract. If any one of these three are not available for inspection, the mission must be cancelled or at least postponed until the authorizations of the aircraft, pilot, or contract can be determined.
  
- Pilots have very specific and closely monitored duty time and flight time limitations that users must understand and adhere to:
  - 14-hour duty day
  - 8 hours flight time per day
  - 2 days off in 14 calendar days
