STDP Priorities Addressed (check all that apply)

- Technologies that address diagnostic and screening tools that lead to the early detection of high priority emerging invasive species.
- Technologies that help quantitatively assess the impacts or risks of multiple interacting threats, including native/invasive insects and diseases, invasive plants, fire, environmental disturbances, and climate change, and include capabilities to better integrate forest health data into cross boundary and landscape-level analyses.
- The development of silviculture and other pest management tools and methods that improve, maintain, and restore forest health.
