

Forest Health Monitoring Program Monthly Update - Supplement June 29, 2016

Job Opportunities

The North Dakota Forest Service is currently advertising the position of Forest Health Manager to be located in Fargo, ND. The Forest Health Manager plans, directs and coordinates Forest Health Management and Forest Health Monitoring Program efforts state-wide. The Manager conducts a state-wide survey of insect and disease problems, with a special emphasis on pests that may be introduced from other regions of the country (Gypsy Moth, Emerald Ash Borer). Other duties include providing public and private forest managers with technical assistance targeting detection, identification and control of insect and disease pests. Also, conducting training sessions on a wide range of appropriate topics including insects and diseases of ND, pest management, tree health care, tree planting, and others. The position includes both office and field duties promoting forest health education outreach. The screening date for applications is **July 1, 2016**. For complete information about the position including instructions for applying, see the [online position announcement](#). North Dakota State University is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, disability or veteran status.
