

BCIP Proposals Recommended for Funding – FY2012

Principal Investigator	Affiliation	Project Title	Total
Roger Becker	Department of Agronomy and Plant Genetics University of Minnesota, St. Paul, Minnesota Becke003@umn.edu	Biological control of garlic mustard: host specificity of a seed-feeding weevil, <i>Ceutorhynchus constictus</i> .	\$75,000
Ikju Park	University of Idaho, Moscow, Idaho Park0563@vandals.uidaho.edu	Using <i>Mogulones borraginis</i> , a potential biocontrol agent for houndstongue, to develop host-specificity testing methods based on olfactory and visual host selection behavior.	\$115,000
Jeffrey Littlefield	Department of Land Resources and Environmental Sciences Montana State University, Bozeman, Montana Jeffrey1@montana.edu	Collecting, redistributing, monitoring populations and estimating impacts of the rush skeletonweed root moth, <i>Bradyrrhoa gilveolella</i> .	\$67,000
Susan Meyer	U.S. Forest Service Rocky Mountain Research Station, Provo, Utah smeyer@fs.fed.us	Preliminary evaluation of <i>Pyricularia grisea</i> as a potential biocontrol for invasive bufflegass in the Sonoran Desert of Arizona.	\$38,000
