OMB Control Number: 0581–0154.

Summary of Collection: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621), Section 203(q), directs and authorizes the collection and dissemination of marketing information including adequate outlook information, on a market area basis, for the purpose of anticipating and meeting consumer requirements aiding in the maintenance of farm income and to bring about a balance between production and utilization. Livestock and Meat Market News provides a timely exchange of accurate and unbiased information on current marketing conditions affecting trade in livestock, meats, grain, and wool. Administered by the U.S. Department of Agriculture’s Agricultural Marketing Service (AMS), this nationwide market news program is conducted in cooperation with approximately 27 States departments of agriculture. AMS will collect information using market reports.

Need and Use of the Information: The information provided by respondents initiates market news reporting, which must be timely accurate, unbiased, and continuous if it is to be meaningful to the industry. AMS will collect information on price, supply, demand, trends, movement, and other information of livestock, meat carcasses, meat and pork cuts, and meat byproducts. U.S. Department of Agriculture; Privacy Act System of Records; Freedom of Information Act and Privacy Act Case Files USDA/FS–61; Narrative Statement

The purpose of the proposed system is to provide the United States Department of Agriculture’s (USDA) Forest Service (FS) the capability to record, control, and determine the status of Freedom of Information Act (FOIA) and Privacy Act (PA) cases, and to prepare a mandatory annual FOIA report to the U.S. Department of Justice. The FOIA and PA Case files are managed by the Office of Regulatory and Management Services Freedom of Information Act/Privacy Act staff. The Forest Service is the administrative agency for this system.

The authority for maintaining this system of records is the Freedom of Information Act, 5 U.S.C. 552; and the Privacy Act of 1974, 5 U.S.C. 552a, as amended.

The information gathered is voluntarily submitted by individuals who request agency records pursuant to the FOIA and PA. The system of records consists of a copy of the request, appeal, request for correction/amendment, or subsequent lawsuit received; a description of the records requested, appealed, or litigated; a copy of records that were provided or denied; a copy of all correspondence related to the case to include final determinations; billing information to include payment delinquencies; and case notes.

Information collected includes the individual’s name, address, telephone number, and email address. The records will be accessible only to authorized agency personnel who need to view the information in order to conduct their assigned duties. All electronic information is maintained by the Forest Service in a web-based database and stored on secured servers in Kansas City, Kansas. Hard copy records are retrieved by name and unique request identification number in lockable file cabinets in office buildings that require USDA employee identification badges or visitors passes to enter.

The system provides for the following routine use disclosures that are necessary and proper for the agency’s administration of its duties in connection with the operation of the FOIA/PA program: in connection with a referral or consultation with another agency; in connection with litigation; for law enforcement purposes; for responses to Congressional inquiries; to the National Archives and Records Administration and the General Services Administration for records inspections; on a limited basis to entities engaged by the agency in the performance of a service; and in connection with information security breaches in order to protect the interests of the individuals covered by the system. While these routine uses allow disclosures outside USDA, and so have some impact on privacy of individuals, they are either necessary for carrying out the agency mission and minimizing waste, fraud, and abuse, are required by law, or benefit the subjects of the records. On balance, the needs of the agency and the benefits to the individuals of these disclosures justify the minimal impact on privacy.

The system of records is not exempt from any provisions of the Privacy Act.
