

Family Forest Ownerships with 10+ Acres in Kentucky, 2011-2013

The U.S. Forest Service, Forest Inventory and Analysis program conducts the National Woodland Owner Survey in order to better understand: who owns America's forests, why they own it, what they have done with it in the past, and what they intend to do with it in the future. This document summarizes data on family forest owners with 10+ acres in Kentucky. These summaries are based on responses from randomly selected landowners from across Kentucky collected between 2011 and 2013 (n=221). For explanations of the numbers and figures below, underlying summary tables, additional results, definitions, and methods see supplementary information at <http://dx.doi.org/10.2737/NRS-RN-205> or visit www.fia.fs.fed.us/nwos.

General Forest Ownership Information¹

Table 1.—Forest land in Kentucky by ownership category

Ownership Category	Area <i>Acres (millions)</i>	Standard Error (SE)
Family	9.1	0.1
Corporate	1.8	<0.1
Other private	<0.1	<0.1
Federal	1.2	<0.1
State	0.2	<0.1
Local	<0.1	<0.1
Total	12.5	0.2

Figure 11.—Management activities.

¹ Values in this section are based on Forest Inventory and Analysis (www.fia.fs.fed.us) data collected between 2005 and 2012.

² Error bars on all figures represent a 68 percent confidence interval around the value depicted.

³ This value does not equal the value in Table 1 because it excludes ownerships with 1-9 acres of forest land.

⁴ Excluding, where applicable, the "none of the above" option, respondents could select multiple options.

⁵ NTFPs = nontimber forest products.

See the Supplemental Information document (<http://dx.doi.org/10.2737/NRS-RN-205>) for details on data sources and graphics.
