

Family Forest Ownerships with 10+ Acres in Maine, 2011-2013

The U.S. Forest Service, Forest Inventory and Analysis program conducts the National Woodland Owner Survey in order to better understand: who owns America's forests, why they own it, what they have done with it in the past, and what they intend to do with it in the future. This document summarizes data on family forest ownerships with 10+ acres in Maine. These summaries are based on responses from randomly selected landowners from across Maine collected between 2011 and 2013 (n=255). For explanations of the numbers and figures below, underlying summary tables, additional results, definitions, and methods see supplementary information at <http://dx.doi.org/10.2737/NRS-RN-205> or visit www.fia.fs.fed.us/nwos.

General Forest Ownership Information¹

Table 1.—Forest land in Maine by ownership category

Ownership Category	Area (millions)	Standard Error (SE)
Family	5.6	0.1
Corporate	10.2	0.1
Other private	0.6	<0.1
Federal	0.2	<0.1
State	0.9	<0.1
Local	0.2	<0.1
Total	17.6	0.2

¹ Values in this section are based on Forest Inventory and Analysis (www.fia.fs.fed.us) data collected between 2008 and 2012.
² Error bars on all figures represent a 68 percent confidence interval around the value depicted.
³ This value does not equal the value in Table 1 because it excludes ownerships with 1-9 acres of forest land.
⁴ Excluding, where applicable, the "none of the above" option, respondents could select multiple options.
⁵ NTFPs = nontimber forest products.
 See the Supplemental Information document (<http://dx.doi.org/10.2737/NRS-RN-205>) for details on data sources and graphics.
