

Family Forest Ownerships with 10+ Acres in the United States*, 2011-2013

The U.S. Forest Service, Forest Inventory and Analysis program conducts the National Woodland Owner Survey in order to better understand: who owns America's forests, why they own it, what they have done with it in the past, and what they intend to do with it in the future. This document summarizes data on family forest owners with 10+ acres in the United States. These summaries are based on responses from randomly selected landowners from across the United States collected between 2011 and 2013 (n=8,576). For explanations of the numbers and figures below, underlying summary tables, additional results, definitions, and methods see supplementary information at <http://dx.doi.org/10.2737/NRS-RN-205> or visit www.fia.fs.fed.us/nwos.

General Forest Ownership Information¹

Table 1.—Forest land in the United States* by ownership category

Ownership Category	Area (millions of acres)	Standard Error (SE)
Family	284.7	0.9
Corporate	122.5	0.7
Tribal	15.7	0.3
Other private	13.8	0.3
Federal	171.2	0.6
State	45.6	0.4
Total	667.1	1.5

* Excluding Alaska, Nevada, and Wyoming due to small sample sizes.

Characteristics of Family Forest Ownerships with 10+ Acres in the United States*

- Area owned: 265,278,000 acres³ (SE=1,210,000)
- Number of ownerships: 4,023,000 (SE=72,000)

¹ Values in this section are based on Forest Inventory and Analysis (www.fia.fs.fed.us) data collected between 1998 and 2013.

² Error bars on all figures represent a 68 percent confidence interval around the value depicted.

³ This value does not equal the value in Table 1 because it excludes ownerships with 1-9 acres of forest land.

⁴ Excluding, where applicable, the "none of the above" option, respondents could select multiple options.

⁵ NTFPs = nontimber forest products.

See the Supplemental Information document (<http://dx.doi.org/10.2737/NRS-RN-205>) for details on data sources and graphics.
