

Forests of Kansas, 2018

Kansas has an estimated **2,483,060** acres of forest land.

This resource update is a brief look at some of the basic metrics that describe the status of and changes to forest resources in Kansas. This information is based on field data collected using the USDA Forest Service Forest Inventory and Analysis (FIA) annualized sample design, and it is updated yearly.

Kansas has 8,713 sample plots across the State, of which 593.0 are currently forested. Each year, about 14-20 percent of these plots are visited and measured by field crews. Data used in this update were accessed from the FIA database on 09/22/2019.

53,838 acres of nonforest revert back to forest annually*

61,466 acres of forest land convert annually* to nonforest

6,925 acres of forest land are treated (harvest, thinning, etc.) annually*

14,614 acres of forest land are disturbed annually* by fire

4,690 acres of forest land are disturbed annually* by weather events

USDA Forest Service - Forest Inventory & Analysis

The estimates presented are based on data retrieved from the FIA database (09/22/2019) and may not reflect the most recent data available from the FIA program. Note – this publication does not include estimates of uncertainty. The most current data and sampling error for the estimates above can be found by visiting <https://www.fia.fs.fed.us/>.

*Average annual estimates are based on data collected across 5-10 years and may not be indicative of the nominal year presented in the title by itself.
