

U.S. Forest Service  
Resource Bulletin PNW-13

1964 OREGON LOG PRODUCTION

by Brian R. Wall

The production of logs in Oregon in 1964 was 9.4 billion board feet, or nearly 9 percent above 1963. This year, 1964, had the third highest level of log production in history, exceeded only in 1955 and in 1952. The proportion of total cut from private lands fell to 43 percent, even though the total private cut increased 6 percent over that in 1963. Forest industry, accounting for 85 percent of the private production, had the greatest absolute increase, 291 million board feet.

Production rose on all public lands, with the Bureau of Land Management showing the greatest increase of 272 million board feet--up 20 percent over 1963. The National Forests reached a new production high of 3.4 billion feet, with an increase of 184 million board feet. An increase of 14 percent was recorded for State lands, and Indian lands increased their production by 27 percent in 1964.

<sup>1</sup> Separate data for public and private unavailable prior to 1958.
