

**Lassen National Forest
Eagle Lake Ranger District
California
2000**

Primarily white fir stand before treatment, which included thinning to reduce the number of trees. Forest health was also improved by reducing the number of trees per acre and reducing the hazardous fuel build up caused by dense forest stands.

Bridge Thin DFPZ Timber Sale (HFQLG)
646 ac.

Eastside Mixed Conifer prior to harvesting (5/29/02) Strata - F3G

Eastside Mixed Conifer after harvesting (8/26/02) Strata - F4N

- . Removed approximately 50 green tons/ac., which was 34% sawlogs and 66% chips and biomass
- . Generated \$227,742.00 or \$441.00/ac. in revenues
- . The objectives were to create a DFPZ and enhance Goshawk habitat
- . CASPO Prescription
