

**Lassen National Forest  
Eagle Lake Ranger District  
California  
2002**

**Mixed conifer (Jeffery pine and white fir) stand before treatment, which included thinning to reduce the number of trees and reduce competition for the pine. Forest health was also improved by reducing the number of trees per acre and reducing the hazardous fuel build up caused by dense forest stands.**

**Bridge Thin DFPZ Timber Sale (HFQLG)  
646 ac.**

**Eastside Pine prior to harvesting (5/29/02) Strata - E3N**

**Eastside Pine after harvesting (8/26/02) Strata - E3P**

- . Removed approximately 50 green tons/ac., which was 34% sawlogs and 66% chips and biomass
- . Generated \$227,742.00 or \$441.00/ac. in revenues
- . The objectives were to create a DFPZ and enhance Goshawk habitat
- . CASPO Prescription
