

MtnClim 2014

Climate Change Workshop for Resource Managers

September 18, 1:00-5:00 PM
Homestead Resort - Midway, Utah

© Jack Brauer: www.MountainPhotography.com

As part of the biennial Mountain Climate Research Conference, a half-day workshop is planned to focus on climate change issues of concern for resource managers in Utah and beyond. This workshop will:

- ♦ *Provide state-of-science updates on the effects of climate change on vegetation and water*
- ♦ *Identify management concerns and priorities*
- ♦ *Focus on sensitive resources and locations*
- ♦ *Discuss options for adapting to changing resource conditions*

Organizers

Dave Peterson, US Forest Service, PNW Research

Station Steve Jackson, USGS Southwest Climate Science

Center Fred Noack, US Forest Service, Region 4

Natalie Little, US Forest Service, Region 4

Charlie Luce, US Forest Service, Rocky Mountain Research Station

No registration fees for participants. You are also welcome to attend the morning scientific session of the conference. See details at <http://www.fs.fed.us/psw/mtnclim/program>. Please RSVP and direct questions to Dave Peterson (peterson@fs.fed.us, 206-732-7812).
