

Proceedings of the Sudden Oak Death Sixth Science Symposium

June 20 to 23, 2016, San Francisco, California, USA

Disclaimer

Papers were provided by the authors in camera-ready form for printing. Authors are responsible for the content and accuracy. Opinions expressed may not necessarily reflect the position of the U.S. Department of Agriculture.

The use of trade or firm names in this publication is for reader information and does not imply endorsement by the U.S. Department of Agriculture of any product or service.

Pesticide Precautionary Statement

This publication reports research involving pesticides. It does not contain recommendations for their use, nor does it imply that the uses discussed here have been registered. All uses of pesticides must be registered by appropriate state or federal agencies, or both, before they can be recommended.

CAUTION: Pesticides can be injurious to humans, domestic animals, desirable plants, and fish or other wildlife if they are not applied properly. Use all pesticides selectively and carefully. Follow recommended practices for the disposal of surplus pesticides and pesticide containers.

Technical Coordinators

Susan J. Frankel is a plant pathologist, U.S. Department of Agriculture Forest Service, Pacific Southwest Research Station, 800 Buchanan Street, Albany, CA 94710-0011 (sfrankel@fs.fed.us); **Katharine M. Harrell** is a public information officer, California Forest Pest Council, University of California, Berkeley, CA 94720-3114 (kpalmieri@berkeley.edu).

Abstract

Frankel, Susan J.; Harrell, Katharine M., tech. coords. 2017. Proceedings of the sudden oak death sixth science symposium. Gen. Tech. Rep. GTR-PSW-255. Albany, CA: U.S. Department of Agriculture, Forest Service, Pacific Southwest Research Station. 106 p.

The Sudden Oak Death Sixth Science Symposium provided a forum for current research on sudden oak death, caused by the exotic quarantine pathogen *Phytophthora ramorum*. More than 50 submissions describing papers or posters on the following sudden oak death/*P. ramorum* topics are included: biology, genetics, nursery and wildland management, monitoring, and ecology. Abstracts are also provided from a special session on *Phytophthoras* in California native plant nurseries and restoration sites.

Keywords: *Phytophthora ramorum*, invasive species, tanoak, *Notholithocarpus densiflorus*, coast live oak, *Quercus agrifolia*

Contents

Impacts and Status of *Phytophthora ramorum*

- 1 Slowing Spread of Sudden Oak Death in Oregon Forests, 2001–2015
Alan Kanaskie, Randy Wiese, Danny Norlander, Jon Laine, Sarah Navarro, Ellen Michaels Goheen, Ron Rhatigan, Everett Hansen, Wendy Sutton, Paul Reeser, Nik Grunwald, Zhian Kamvar, and Nancy Osterbauer
- 2 Lessons from 15 Years of Monitoring Sudden Oak Death and Forest Dynamics in California Forests
Margaret Metz, J. Morgan Varner, Ross Meentemeyer, Kerri Frangioso, and David Rizzo
- 4 *Phytophthora ramorum*: Update On the Impact and Wider Consequences of the Epidemic in Britain
J.F. Webber

Sudden Oak Death and Landscape Ecology

- 7 Resilience of Diversity-Disease Risk Interactions Following Wildfire Disturbance
Devon A. Gaydos, Krishna Pacifici, Ross K. Meentemeyer, and David M Rizzo
- 8 Effects of Diversity, Topography, and Interannual Climate Variability on Pathogen Spillover
Whalen W. Dillon, Ross K. Meentemeyer, and David M. Rizzo
- 9 Collaboratively Managing Sudden Oak Death Using Tangible Geospatial Modeling
Ross K. Meentemeyer, Francesco Tonini, Douglas Shoemaker, Richard C. Cobb, Brendan A. Harmon, Vaclav Petras, Anna Petrasova, and Helena Mitasova
- 11 How Well Has the Spread of Sudden Oak Death Been Predicted by the Models in Northern California?
Yana Valachovic, Richard Cobb, and Brendan Twieg

Sudden Oak Death Management

- 13 Lessons Learned from the USDA Forest Service, Pacific Southwest Region, Sudden Oak Death Management Program
Phil Cannon, Susan J. Frankel, and Pete Angwin
- 15 Conditions 10 Years after Sudden Oak Death Suppression Treatments in Humboldt County, California
Yana Valachovic, Richard Cobb, and Brendan Twieg
- 19 Reducing CO₂ Emissions by Managing for Sudden Oak Death...Is It Possible?
Brendan Twieg, Yana Valachovic, Richard Cobb, and Dan Stark

23 Restoration of Mount Tamalpais Forests Destroyed by the Sudden Oak Death Pathogen
Richard C. Cobb, David M. Rizzo, Kerri Frangioso, Peter Hartsough, Janet Klein, Mike Swezy, Andrea Williams, Carl Sanders, and Susan J. Frankel

24 Managing Sudden Oak Death on Federal Lands in Southwest Oregon: Triumphs and Challenges
Ellen Michaels Goheen

Ecology: Forest Change Over Time

25 Long-Term Monitoring of Sudden Oak Death in Marin County and the East Bay Hills
Brice A. McPherson, Greg Biging, Maggi Kelly, and David L. Wood

27 Novel Interactions between Wildfire and Sudden Oak Death Influence Sexual and Asexual Regeneration in Coast Redwood Forests
Allison B. Simler, Margaret R. Metz, Ross K. Meentemeyer, Kerri M. Frangioso, and David M. Rizzo

29 Vibrational Spectroscopy-Based Chemometrics to Map Host Resistance to Sudden Oak Death
Pierluigi (Enrico) Bonello, Anna O. Conrad, Luis Rodriguez Saona, Brice A. McPherson, and David L. Wood

31 Urban Activities Influence on *Phytophthora* Species Diversity in British Columbia, Canada
Angela Dale, Nicolas Feau, Julien Ponchart, Guillaume Bilodeau, Jean Berube, and R.C. Hamelin

Acute Oak Decline in the United Kingdom

33 A Polyphasic Approach to Gaining Insights Into Causes of Acute Oak Decline in Britain
Sandra Denman

34 Monitoring for Pests and Diseases in Native Oak Woodlands: The Case of Acute Oak Decline in the United Kingdom
Nathan Brown, Stephen Parnell, Frank van den Bosch, Mike Jeger, and Sandra Denman

Genetics

36 Transcriptome Analysis of Tanoak Reveals Divergent Mechanisms of Innate and Phosphite-Induced Resistance to *Phytophthora ramorum*
Catherine A. Eyre, Katherine J. Hayden, Peter Croucher, Shannon Schechter, Jessica W. Wright, and Matteo Garbelotto

- 37 Host-Induced Genome Alterations in *Phytophthora ramorum*
 I. NA1 Lineage on Coast Live Oak in California
 II. EU1 Lineage on *Chamaecyparis lawsoniana* in UK
Takao Kasuga, Mai Bui, Elizabeth Bernhardt, Tedmund Swiecki, Kamyar Aram, Lien Bertier, Jennifer Yuzon, Liliana M. Cano, Joan Webber, Clive Brasier, Caroline Press, Niklaus Grünwald, David Rizzo, and Matteo Garbelotto
- 40 Analysis of Populations of the Sudden Oak Death Pathogen in Oregon Forests
Zhian N. Kamvar, Everett M. Hansen, Alan M. Kanaskie, Meredith M. Larsen, and Niklaus J. Grünwald
- 41 Biological Differences Between the Evolutionary Lineages Within *Phytophthora ramorum* and *Phytophthora lateralis*: Should the Lineages Be Formally Taxonomically Designated?
Clive Brasier

Nurseries and Managed Landscapes

- 43 Managing *Phytophthora ramorum* at Bloedel Reserve
Darren Streng, Marianne Elliott, Gary Chastagner, Casey Sclar, and Daniel Stern
- 45 Hot Spots of *Phytophthora* in Commercial Nurseries
Corina Junker, Patrick Goff, Stefan Wagner, and Sabine Werres
- 46 Pilot Program (Proof of Concept) to Mitigate *Phytophthora ramorum* at an Infested Nursery Based on a Systems Approach
Gary Chastagner and Marianne Elliott
- 48 Incubation of *Phytophthora ramorum*-Infested Leaf Debris in Soil Affects Survival, Sporulation Capacity, and Subsequent Risk of Epidemic Development Within Nurseries
Ebba K. Peterson, Niklaus J. Grünwald, and Jennifer L. Parke
- 49 Relative Heat Sensitivities of Certain *Phytophthora* spp. and the Potential for Soil Solarization to Disinfest Nursery Beds in West Coast States
Jennifer L. Parke, Fumiaki Funahashi, Clara Weidman, and Ebba K. Peterson

***Phytophthora* Detections in Native Plant Nurseries and Restoration Sites**

- 51 An Update on *Phytophthora* Species in California Native Plant Nurseries and Restoration Areas
S. Rooney-Latham, C.L. Blomquist, M.C. Soriano, Y.Y. Guo, P. Woods, K.L. Kosta, K. Weber, T.J. Swiecki, E.A. Bernhardt, K. Suslow, and S.J. Frankel
- 52 Restoration Outplantings of Nursery-Origin Californian Flora Are Heavily Infested with *Phytophthora*
Tyler B. Bourret, Heather K. Mehl, David M. Rizzo, Tedmund J. Swiecki, Elizabeth A. Bernhardt, and Janell M. Hillman

- 53 Testing and Implementing Methods for Managing *Phytophthora* Root Diseases in California Native Habitats and Restoration Sites
Tedmund J. Swiecki and Elizabeth A. Bernhardt
- 56 Steam, Solarization, and Tons of Prevention: The San Francisco Public Utilities Commission's Fight to Contain Phytophthoras in San Francisco Bay Area Restoration Sites
Greg Lyman, Jessica Appel, Mia Ingolia, Ellen Natesan, and Joe Ortiz
- 57 31 Flavors to 50 Shades of Grey: Battling Phytophthoras in Native Habitats Managed by the Santa Clara Valley Water District
Janet Hillman, Tedmund J. Swiecki, Elizabeth A. Bernhardt, Heather K. Mehl, Tyler B. Bourret, and David Rizzo
- 59 The Golden Gate National Parks *Phytophthora* Response Plan
Alisa Shor, John Doyle, Sharon Farrell, Alison Forrestel, Christa Conforti, Lew Stringer, Terri Thomas, and Laura Lee Sims

Posters

- 60 *Phytophthora ramorum* and *Phytophthora gonapodyides* Differently Colonize and Contribute to Decay of California Bay Laurel (*Umbellularia californica*) Leaf Litter in Stream Ecosystems
Kamyar Aram and David M. Rizzo
- 62 Determining the Amount of Soilborne Inoculum of *Phytophthora ramorum* Within an Oregon Tanoak Forest
Christina Benemann and Jennifer Parke
- 63 *Rhododendron* Leaf Baiting of Coastal California Watersheds for *Phytophthora*
Tyler B. Bourret, Heather K. Mehl, Kamyar Aram, and David M. Rizzo
- 64 Microsatellite Analysis of the EU1 Lineage of *Phytophthora ramorum* in Washington State Nurseries, Landscapes, and Waterways
Katie Coats, Marianne Elliott, and Gary Chastagner
- 65 How Do We Know if Plants in Our Nursery Have *Phytophthora*? Detection Methods and an Integrated Approach to Monitoring
Christa Conforti
- 66 Next Generation Sequencing of Oomycete Communities in Nursery Irrigation Water
Joyce Eberhart, Fumiaki Funahashi, Zachary S. L. Foster, and Jennifer Parke
- 70 Monitoring Streams and Stormwater Ponds for Early Detection of Oomycete Plant Pathogens in Western Washington, a Citizen Science Project
Marianne Elliott, Lucy Rollins, and Gary Chastagner
- 72 Testing Biological Control Agents for Suppression of *Phytophthora ramorum* in Potting Mixes in a Simulated Nursery Environment
Marianne Elliott and Gary Chastagner
- 73 Development of a Predictive Model to Estimate the Effect of Soil Solarization on Survival of Soilborne Inoculum of *Phytophthora ramorum* and *Phytophthora pini*
Fumiaki Funahashi and Jennifer L. Parke
- 74 CALINVASIVES: A Revolutionary Tool to Monitor Invasive Threats
M. Garbelotto, S. Drill, C. Powell, and J. Malpas
- 75 Validation of the Bait Test with *Rhododendron* Leaves for *Phytophthora* Diagnosis
Corina Junker and Sabine Werres
- 76 Diversity of Foliar *Phytophthora* Species on *Rhododendron* in Oregon Nurseries
B.J. Knaus, K.A. Graham, Niklaus J. Grünwald, and Valerie J. Fieland

- 77 Development of Reagents for Immunoassay of *Phytophthora ramorum* in Nursery Water Samples
Douglas G. Luster, Timothy Widmer, and Michael McMahon, and C. André Lévesque
- 78 Sentinel Plant Monitoring of *Phytophthora ramorum* at a Research Nursery Over a Six-Year-Period Indicates Limited Aerial Pathogen Spread
Tomas Pastalka, Karen Suslow, and Wolfgang Schweigkofler
- 79 Management of Foliar Infection of Rhododendron by *Phytophthora ramorum* with Film Forming Polymers and Surfactants
Ebba K. Peterson, Eric Larson, and Jennifer L. Parke
- 81 Soil Moisture and Temperature Conditions Affect Survival and Sporulation Capacity of Rhododendron Leaf Disks Infested with *Phytophthora ramorum*
Ebba K. Peterson, Niklaus J. Grünwald, and Jennifer L. Parke
- 83 Identification of Five New Hosts of *Phytophthora ramorum* in an Infested Forest in California
S. Rooney-Latham, C.L. Blomquist, A. Williams, E. Gunnison, and T. Pastalka
- 85 Host Range Determination and Fungicide Resistance Assessment of *Phytophthora lateralis* Isolates from Horticultural Nurseries in Oregon
Franziska Rupp, Ebba K. Peterson, Joyce Eberhart, and Jennifer L. Parke
- 87 Thermal Inactivation of Infested Plants, Nursery Equipment, and Soil is a Management Option for the Treatment of *Phytophthora ramorum*, Causal Agent of Sudden Oak Death
Wolfgang Schweigkofler, Vernon Huffman, Karen Suslow, and Kathleen Kosta
- 88 Research on the Quarantine Pathogen *Phytophthora ramorum* at the National Ornamentals Research Site at Dominican University of California
Wolfgang Schweigkofler, Kathleen Kosta, Tomas Pastalka, Vernon Huffman, Supriya Sharma, and Karen Suslow
- 91 Potential Susceptibility of Canadian Flora to EU2 Lineage of *Phytophthora ramorum*
S.F. Shamoun, G. Sumampong, D. Rioux, and A. Schlenzig
- 99 Interaction of *Trichoderma asperellum* with *Phytophthora ramorum* Inoculum Soil Populations and Enzyme Secretion
Supriya Sharma, Wolfgang Schweigkofler, Karen Suslow, Timothy L. Widmer
- 100 Solarization of Reused Pots Is an Inexpensive and Efficient Method to Eliminate *Phytophthora cactorum* and Other Serious Soilborne *Phytophthora* spp. Found in Production Nurseries
K. Suslow, S. Sharma, K. Kosta, Kristina Weber, and S. Rooney-Latham
- 102 The Effect of Moisture on Infection of Rhododendron ‘Cunningham’s White’ and *Viburnum tinus* by Zoospores of *Phytophthora ramorum*
Paul W. Tooley and Marsha Browning

- 103 This Tree Is Not Big Enough for the Both of Us: Symptoms of *Phytophthora ramorum* on California Bay Laurel Are Lower When Insect Herbivores Are Abundant
Kerry E. Wininger and Nathan Rank
- 104 Longevity of Active *Phytophthora ramorum* in Terminal Tree Hosts following the Removal of Primary Sporulating Hosts
Barnaby Wylder, Mick Biddle, Anna Harris, and Joan Webber
- 105 Resequencing of the *Phytophthora ramorum* Genome to Characterize Genetic Variation and Population Dynamics of the Invasive Pathogen
Jennifer Yuzon, David M. Rizzo, Mathu Malar C, Sucheta Tripathy, and Takao Kasuga

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.
