CALIFORNIA CONSORTIUM 2010 SUMMER INTERNSHIP PROGRAM - WELCOME -

The California Consortium (CC) is pleased to present the 2010 Summer Internship Booklet, which highlights students who successfully completed Forest Service internships. The CC is dedicated to delivering a program that is both efficient and effective for the Forest Service, underserved communities, and participating students. The students highlighted here have been recruited and placed by the CC, which is comprised of the Northern California Consortium (NCC), the Central California Consortium (CCC), and the Southern California Consortium (SCC). As a team, this year the CC successfully placed over 260 students in Region 5, Region 6, and Washington D.C.; a record breaking number for the program.

The CC's goals include ensuring that students receive a valuable work experience, as they consider Forest Service careers. We accomplish this by taking the time to learn about our student's interests, capabilities and goals through a detailed in-depth screening process, which includes personal statements, resumes, and interviews. We match the skills, experience, and career goals of our intern candidates to supervisors, who provide mentoring and a positive work environment. Students work in fields such as, firefighting, archaeology, civil engineering, recreation, geology, and wildlife biology. Many of these students attend our professional development workshops on topics such as: resume writing and public speaking. As a result of their internship, students become advocates of the environment, continue their education, go on to higher education. Many choose to go into natural resource careers, and many gain permanent careers within the agency. All the students gain confidence and leadership skills that will transfer to help them succeed academically and personally.

We congratulate the students who participated in the CC employment program this year and encourage them to continue their educational goals. We thank our grant funding providers, which include the Fresno Resource Advisory Committee (RAC), Pacific Forest and Watershed Lands Stewardship Council, and Lake Tahoe Basin Management Unit, The Wilderness Recreation Enhancement Act Grant. We also thank the Forest Service, the communities we serve, and our community partners for their continued support.

Sincerely,

Jim Ofedal

CALIFORNIA CONSORTIUM MISSION STATEMENT

The California Consortium is an environmental education, outreach, and recruitment program for students. The Consortium is divided into three geographic areas -- Central, Southern and Northern California – and each geographic area has a full-time program manager assigned to it. The Consortium program managers work under the supervision of the applicable Forest Supervisors. The program targets students ranging from kindergarten through the twelfth grade and works with college students as well. Through its education and outreach activities, the program encourages members of under-participating groups to participate in the agency's Student Career Experience Program (SCEP). The long range goal of the program is to convert student employees into permanent members of the Region's workforce. The Consortium enables the region to build relationships with local communities and cultivate a diverse applicant pool for the future.

California Consortium Mission Areas:

- Establish relationships with Hispanic and other diverse communities.
- Increase the awareness of opportunities provided by public lands through environmental education.
- Provide programs to develop employment opportunities in natural resource management for members of Hispanic and other diverse communities.
- Contribute to the Regional Recruitment Plan goals by providing job placement opportunities for program participants with the Forest Service and other land management agencies and organizations.

Central California Consortium

(CCC) 2010 Staff

James Oftedal

Program Director

James Oftedal has over 26 years of dedicated service to USDA Forest Service. For over 15 years, he has served as the director of the Central California Consortium (CCC). Oftedal has dedicated his career to sharing the Forest Service mission and stewardship message with underserved communities and to help diversify the Forest Service workforce by recruiting diverse students. He is a mentor to many, as he encourages higher education and natural resource careers. In 2006, his program received the highest compliment possible when it was replicated to include two new sites; the NCC and SCC, creating the statewide California Consortium.

The CCC has received local, regional, and national recognition including awards like the Key to the City of Orange Cove, the Chief's New Century of Service Award, the USDA Unsung Hero Award, and the Central Valley Local Hero of the Year. He is proud of the success that he and his staff have achieved. However, he is most proud of his daughters, Gabriella, 16, and Jaime 13.
