As Klamath Bird Observatory co-founder and Executive Director, John has been working to integrate bird conservation with natural resource management in the Pacific Northwest. He is focused on applying bird conservation science as a tool for advancing ecosystem conservation regionally, nationally, and internationally. His expertise includes participatory action research; ecological monitoring and research using standard bird and habitat sampling techniques; the use of scientific results for overcoming land stewardship challenges; and the development of applied science tools and teaching materials for natural resource management professionals, community members, and students of all ages. John also serves as Courtesy Faculty at Oregon State University. Through his domestic and international work and leadership John has earned several awards, including the Partners in Flight International Leadership Award, the Joint Fire Science Program’s Best Scientist-Manager Partnership Award, and the US Forest Service’s International Wings Across the Americas.
