ARIZONA LOCALITIES OF INTEREST TO BOTANISTS

COMPILED BY T. H. KEARNEY

BUREAU OF PLANT INDUSTRY U. S. DEPARTMENT OF AGRICULTURE

The following list is believed to be fairly comprehensive as regards the names of localities mentioned by collectors of Arizona plants on labels of specimens, and in publications. The names of counties, and usually the section of the county, are given in parenthesis. Altitudes, when known, are stated in feet. Those given for mountain peaks or ranges are of the highest summit, unless otherwise indicated. Altitudes as given on topographic maps of the U. S. Geological Survey were preferred whenever obtainable, but many of the data were taken from labels

of herbarium specimens are probably only approximate. The compiler is indebted to the U. S. Geological Survey, Department of the Interior, for much information in regard to the altitudes of Arizona localities, and to the U. S. Forest Service, Department of Agriculture, for data on the location and altitude of ranger stations, including many that have been discontinued. The latter are indicated by an asterisk. *Arizona Place Names*, by Will C. Barnes, has been consulted freely in preparing this list.¹
