This poster shows the locations of stream temperature data from Oregon that have been contributed to the NorWeST regional stream temperature database and model project (Isaak et al. 2011). During the next year, these data (and any other data contributed soon) will be integrated into a functional, interagency database and used to parameterize a spatial statistical network model (see companion poster). Isaak et al. 2010 shows accurate predictions among temperature measurement sites. The temperature model will then be used to develop a set of high-resolution (1 kilometer) digital maps that represent historical and future climate scenarios in all streams. Additional details regarding the NorWeST project and temperature model are at this website (Isaak et al. 2011) and details regarding the spatial statistical network models are at the SSN/STARS website (www.ssnonline.org/awes/projects/NorWeST/). These data contributors provided information for multiple entities:

**Oregon DEQ** (Alsea, Umatilla, Deschutes, Malheur); BLM (Bureau of Land Management); USDA Forest Service; Oregon Dept. of Forestry; Roseburg Forest Products; Umpqua Watershed Council; Upper Sandy River Watershed Council; Confederated Salish and Kootenai Tribes; Confederated Tribes of Warm Springs; Gila National Forest; Idaho Power; Jackson County (JCN); Klamath County; Klamath Tribes; Medford Water Commission; Middle Rogue Watershed Council; Monument Soil and Water Conservation District; Oregon Dept. of Fish and Wildlife; Oregon Dept. of Forestry; Oregon Dept. of Transportation; Oregon Land Conservation and Development Commission; Oregon Natural Heritage Program; Oregon Tech; Oregon State University; Pacific Power; Portland General Electric; Portland Water Bureau; Rogue River Watershed Council; Scappoose-Wilsonville Watershed Council; Shasta Trinity National Forest; South Sandy River Watershed Council; Siuslaw Watershed Council; Tumwater Fish and Wildlife; Upper Sandy River Watershed Council; U.S. Forest Service; Roseburg Forest Products; Roseburg Paper Company; Umpqua Basin WCD; Willamette River Basin WCD; Yellowstone National Park; Yakima River WCD; Yakima River Watershed Council; Yakima Valley Project; Yakima Valley Water Quality Council; Yakima Valley Watershed Council; Yakima Valley Watershed Council, Yakima River Project.

This poster is funded by the Great Northern Restoration Partnership and the Northern Rocky Mountain Science Center. Please visit the NorWeST website located at www.fishwild.org/norwest for more information.
