Erratum: Basin-scale availability of salmonid spawning gravel as influenced by channel type and hydraulic roughness in mountain catchments

John M. Buffington, David R. Montgomery, and Harvey M. Greenberg

Erratum: Basin-scale availability of salmonid spawning gravel as influenced by channel type and hydraulic roughness in mountain catchments

John M. Buffington, David R. Montgomery, and Harvey M. Greenberg

Plane-bed and pool–riffle channels were incorrectly identified in the caption for Fig. 2. The second sentence of the caption should have read “... PB, plane-bed (circles); PR, pool–riffle (open triangles)...”. In addition, the exponents reported in Fig. 2 for PR, wPR, SP, and CA channels should have read 0.50, 0.59, 0.63, and 0.71, respectively. The corrected figure is shown.

Fig. 2. Bank-full Shields stress ($\tau_{bf}^n$) as a function of total bank-full shear stress ($\tau$) and channel type in Pacific Northwest rivers (morphologic definitions of Montgomery and Buffington 1997, 1998; Buffington et al. 2003). PB, plane-bed (circles); PR, pool–riffle (open triangles); wPR, wood-forced pool–riffle (squares); SP, step–pool (diamonds); CA, cascade (solid triangles). PB, PR, and wPR data are from Buffington and Montgomery (1999a, 2001); SP and CA data are from Montgomery and Buffington (1997).
