CONTENTS

Foreword ............................................................................................................................................... ii
Acknowledgements ............................................................................................................................... iv
Executive Summary ............................................................................................................................... ix
Introduction ........................................................................................................................................ 1

V. Alaric Sample, Pinchot Institute for Conservation, Washington, DC

Section I: Monitoring and Projecting Effects of Changing Climatic Regimes and Other Large-scale, Long-term Influences on Forest Ecosystems and Sustainable Management of Forests ......................................................................................................................... 9

Climate Change in the Age of Humans ............................................................................................... 11
J. Curt Stager, Natural Sciences, Paul Smith’s College, Paul Smiths, NY
Evidence-based Planning for Forest Adaptation ............................................................................... 27
Lee Hannah, Conservation International, Arlington, VA
Thomas E. Lovejoy, George Mason University, Fairfax, VA
Adapting Forest Science, Practice, and Policy to Shifting Ground: From Steady-State Assumptions to Dynamic Change ................................................................................................................. 35
Daniel B. Botkin, University of Miami, Coral Gables, FL
Evolving Conservation Paradigms for the Anthropocene .................................................................. 47
Ariel E. Lugo, International Institute of Tropical Forestry, USDA Forest Service
Terrestrial Protected Areas: Threats and Solutions ............................................................................. 61
Tim Caro, Department of Wildlife, Fish and Conservation Biology, University of California at Davis
Grace K. Charles, Department of Plant Sciences, University of California at Davis
Dena J. Clink, Department of Anthropology, University of California at Davis
Jason Riggio, Department of Wildlife, Fish and Conservation Biology, University of California at Davis
Alexandra Weill, Department of Plant Sciences, University of California at Davis
Carolyn Whitesell, Graduate Group in Ecology, University of California at Davis

Section II: Uncharted Territory: Assessing Vulnerability and Developing Options for Sustaining Key Values and Services From Forest Ecosystems Under Conditions of Elevated Uncertainty ......................................................................................... 79

Briefing: Climate and Wildfire in Western U.S. Forests .................................................................... 81
Anthony Westerling, Environmental Engineering and Geography, Sierra Nevada Research Institute, University of California, Merced
Tim Brown, Western Regional Climate Center, Division of Atmospheric Sciences, Desert Research Institute, University of Nevada, Reno
Tania Schoennagel, Department of Geography, University of Colorado, Boulder
Thomas Swetnam, Laboratory of Tree-Ring Research, University of Arizona
Monica Turner, Department of Zoology, University of Wisconsin
Thomas Veblen, Department of Geography, University of Colorado, Boulder
Forest Ecosystem Re-organization Underway in the Southwestern United States: A Preview of Widespread Forest Changes in the Anthropocene? ................................................................. 103
Craig D. Allen, U.S. Geological Survey, Fort Collins Science Center, Jemez Mountains Field Station, Los Alamos, NM

Increasing Resiliency in Frequent Fire Forests: Lessons from the Sierra Nevada and Western Australia ............................................................................................................. 123
Scott L. Stephens, Department of Environmental Science, Policy, and Management, University of California, Berkeley, Berkeley, CA

Planning the Future’s Forests with Assisted Migration .................................................................................................................. 133
Mary I. Williams, Michigan Technological University, Houghton, MI
R. Kasten Dumroese, USDA Forest Service, Rocky Mountain Research Station, Moscow, ID

Invasive Plants, Insects, and Diseases in the Forests of the Anthropocene ............................................. 145
Alexander M. Evans, Forest Guild, Santa Fe, NM

Indigenous Experiences in the U.S. with Climate Change and Environmental Stewardship in the Anthropocene ........................................................................................................ 161
Karletta Chief, (Navajo Nation), Department of Soil, Water, and Environmental Sciences, University of Arizona, Tucson, AZ
John J. Daigle, (Penobscot Nation), School of Forest Resources, University of Maine, Orono, ME
Kathy Lynn, Environmental Studies Program, University of Oregon, Eugene, OR
Kyle Powys Whyte, (Citizen Potawatomi Nation), Department of Philosophy, Michigan State University, East Lansing, MI

Journeying into the Anthropocene—Scots Pine and Eastern Hemlock Over the Next 400 Years ........................................................................................................................ 177
Duncan Stone, Scottish Natural Heritage, Inverness, Scotland, and Harvard Forest, Petersham, MA, USA

Mitigating Anthropocene Influences in Forests in the United States ................................................... 189
Chadwick Dearing Oliver, Global Institute of Sustainable Forestry; School of Forestry and Environmental Studies; Yale University; New Haven, CT

Section III: Developing and Implementing Adaptation Strategies for Biodiversity Conservation on Large Landscapes and Varying Patterns of Public and Private Ownership ........................................................................................................ 203

Challenges and Opportunities for Large Landscape-Scale Management in a Shifting Climate: The Importance of Nested Adaptation Responses Across Geospatial and Temporal Scales ........................................................................................................ 205
Gary M. Tabor, Center for Large Landscape Conservation, Bozeman, MT
Anne Carlson, The Wilderness Society, Bozeman, MT
Travis Belote, The Wilderness Society, Bozeman, MT

Implementing Climate Change Adaptation in Forested Regions of the United States ........ 229
Jessica E. Halofsky, University of Washington, College of the Environment, School of Environmental and Forest Resources
David L. Peterson, USDA Forest Service, Pacific Northwest Research Station, Pacific Wildland Science Fire Laboratory
Linda A. Joyce, Human Dimensions Research Program at the USDA Forest Service, Rocky Mountain Research Station
Constance I. Millar, USDA Forest Service, Pacific Southwest Research Station
Janine M. Rice, University of Colorado, Western Water Assessment and the USDA Forest Service, Rocky Mountain Research Station
Christopher W. Swanston, USDA Forest Service, Northern Research Station
Improving the Role of Vulnerability Assessments In Decision Support for Effective Climate Adaptation .......................................................... 245
Linda A. Joyce, USDA Forest Service, Rocky Mountain Research Station, Ft. Collins, CO
Constance I. Millar, USDA Forest Service, Pacific Southwest Research Station, Albany, CA

Maintaining Forest Diversity in a Changing Climate: a Geophysical Approach ............... 273
Mark Anderson, North America Eastern Division, The Nature Conservancy
Nels Johnson, Pennsylvania Chapter, The Nature Conservancy
Scott Bearer, Pennsylvania Chapter, The Nature Conservancy

Adaptation Approaches for Conserving Ecosystems Services and Biodiversity in Dynamic Landscapes Caused By Climate Change .................................................. 297
Oswald J. Schmitz, Yale University, School of Forestry and Environmental Studies, New Haven, CT
Anne M. Trainor, Yale University, School of Forestry and Environmental Studies, New Haven, CT

Section IV: Water Resource Protection: Investment Strategies for Managing Risks From Wildfires, Pests/Pathogens, and Severe Storm Events ........................................ 311

Adaptation: Forests as Water Infrastructure in a Changing Climate ................................. 313
Todd Gartner, Nature for Water Campaign, World Resources Institute, Portland, OR
Heather McGary, Vulnerability and Adaptation Initiative, World Resources Institute
James Mulligan, Green Community Ventures
Jonas Epstein, World Resources Institute
Ayesha Dinshaw, Vulnerability and Adaptation Initiative, World Resources Institute

Water Source Protection Funds as a Tool to Address Climate Adaptation and Resiliency in Southwestern Forests ............................................................... 329
Laura Falk McCarthy, The Nature Conservancy in New Mexico, Santa Fe, NM

Measuring Resilience to Climate Change: The Benefits of Forest Conservation in the Floodplain ........................................................................................................ 345
Carolyn Kousky, Resources for the Future, Washington, DC
Margaret Walls, Resources for the Future, Washington, DC
Ziyan Chu, Resources for the Future, Washington, DC

A Community Based Approach to Improving Resilience of Forests and Water Resources: A Local and Regional Climate Adaptation Methodology ........................................ 361
Toby Thaler, Model Forest Policy Program, Seattle, WA
Gwen Griffith, Cumberland River Compact, Nashville, TN
Nancy Gilliam, Model Forest Policy Program, Sagle, ID

Climate Change Effects on Forests, Water Resources, and Communities of the Delaware River Basin ........................................................................................................ 379
Will Price and Susan Beecher, Pinchot Institute for Conservation, Washington, DC

Cumulative Effects: Managing Natural Resources for Resilience in the Urban Context........ 393
Sarah C. Low, Philadelphia Field Station, USDA Forest Service, Northern Research Station, Philadelphia, PA

Considerations for Forest Adaptation to Climate Change in Sustainable Production of Wood/Fiber/Biomass and Ecosystem Services ......................................................... 403
Roger A. Sedjo, Resources for the Future, Washington, DC
Section V: Evolving Institutional and Policy Frameworks to Support Timely Implementation of Adaptation Strategies ........................................... 411

National Wildlife Refuges: Portals to Conservation ............................................. 413
Joseph F. McCauley, National Wildlife Refuge System, U.S. Fish and Wildlife Service, Division of Realty, Hadley, MA

Policy Challenges for Wildlife Management in a Changing Climate .................... 427
Mark L. Shaffer, Office of the Science Advisor, U.S. Fish and Wildlife Service

Evolving Institutional and Policy Frameworks to Support Adaptation Strategies ....... 443
Dave Cleaves, USDA Forest Service—Office of the Climate Change Advisor, Washington, DC

Climate Change: Wilderness’s Greatest Challenge .............................................. 453
Nathan L. Stephenson, U.S. Geological Survey, Three Rivers, CA
Constance I. Millar, USDA Forest Service Pacific Southwest Research Station, Albany, CA

Evolving the Policy Framework: Budget Strategies, Legislative Authorities, and Management Strategies to Facilitate Federal Forest Adaptation and Collaborative Partnerships ..................................................... 461
Christopher Topik, The Nature Conservancy, North America Region, Arlington, VA
Paige Lewis, The Nature Conservancy, Boulder, CO

Summary and Synthesis ....................................................................................... 471

V. Alaric Sample
Christopher Topik
