

Drought Webinars

The *Office of Sustainability and Climate* invites you to join any of the webinars in our series about the effects of drought and other water challenges facing our national forests and grasslands. Recordings and supporting materials are available for webinars that have been held to date.

Date	Topic	Connection Information/Recording
October 4, 2016	National Kick-off Webinar - Responding to Drought and Water Challenges: Overview of the impacts of long term drought and other water challenges facing forests and grasslands from climate change.	Recording available at: http://www.forestrywebinars.net/webinars/drought-and-water-challenges
January 11, 2017	Fisheries – Responding to Drought and Water Challenges: Coldwater fisheries and climate adaptation case studies in the Western and Eastern U.S.	Recording available at: http://www.forestrywebinars.net/webinars/fisheries-responding-to-drought-and-water-challenges
February 7, 2017	Drought, Water Extremes, and Infrastructure: How researchers and managers are assessing and addressing the impacts of drought and water challenges on facilities, dams, roads, and other infrastructure.	Recording available at: http://www.forestrywebinars.net/webinars/drought-water-extremes-and-infrastructure
March 22, 2017	The Effects of Drought on Recreation and Wilderness: Exploring the impacts of drought on recreation and Wilderness opportunities, and strategies for addressing them.	Recording available at: http://climatewebinars.net/webinars/drought-recreation-wilderness
April 4, 2017	Drought and Forest Ecosystems: Explore current issues related to drought in forests, examples of drought and climate-related impacts, and management options for increasing resilience.	Recording available at: http://climatewebinars.net/webinars/drought-forest-ecosystems
June 7, 2:00-3:30 EDT	Drought and Rangelands: Explore the impacts of drought on rangelands and discuss ideas on ways to mitigate these impacts.	Recording available at: http://climatewebinars.net/webinars/drought-rangelands
July 25, 2:00-3:30 EDT	Drought and Urban Forests: Overview of the effects of drought on urban and community forests, along with ideas for adaptation tactics.	Recording available at: http://climatewebinars.net/webinars/drought-urbanforests
Sept. 14 2:00-3:30 EDT	Drought and Invasive Species: Explore the relationship between drought and invasive species and how invasives are changing the landscape.	Recording available at: http://climatewebinars.net/webinars/drought-invasives
