**Risks**

There is a slight risk of complications from participating in this test including injuries (blisters, sore legs, sprains) but also heart attack, rhabdomyolysis, compartment syndrome, heat illness, and possibly death.

If you have been inactive and have not practiced or trained for the test, you should engage in several weeks of specific training before you take the test. Be certain to warm up and stretch before taking the test and to cool down after the test. By completing the Health Screening Questionnaire and/or a physical exam, the potential risk of serious consequences is reduced.

---

I have read the information on this form and in the brochure “Work Capacity Test,” understood and truthfully answered the Health Screening Questionnaire (if applicable), and understand the purpose, instructions, and risks of the job related to the work capacity test.
