INTERNATIONAL SEMINAR ON CLIMATE CHANGE & NATURAL RESOURCE MANAGEMENT

May 7th - 26th, 2018
Washington D.C. & California, United States
SEMINAR THEMES

1) Impacts of Climate Change (What is happening?):
Presenters focus on historic, ongoing, and modeled future changes in ecosystem processes and their impacts on communities, using projects in California as live case studies and examples for critical exploration and discussion. Participants will have access to an extensive collection of publications, sources of information, and a global network of professionals.

2) Adaptation and Mitigation of Climate Impacts on Natural Resources (What can we do about it?):
Through stimulated discussion, field visits, and regional sharing, the seminar addresses best practices to manage natural resources under climate change and to support retention and sequestration of carbon in natural systems. It explores new and emerging analytical tools and technologies to assess the impact of climate change on natural resources and the outcomes of resource management measures.

3) Institutional Responses to Climate Change (How will we do it?):
Participants and representatives from government, civil society, donor entities, and international organizations convene and discuss applied strategies for how their institutions prepare for and play a role in climate change adaptation. Topics include: opportunities for funding; environmental, economic, and social information and communications needed to support decision-making and build public support; carbon markets; and developing programmatic initiatives.

This seminar is for program leaders and natural resource field managers engaged in climate change issues. The seminar is an engaging, interactive, and highly informative training and field study program that covers policy and technological developments as well.

HOW TO APPLY
Please visit: www.fs.fed.us/about-agency/international-programs/training-seminars to complete the application, and submit it to: climateseminar@ucdavis.edu
More information is available at: http://ipclimatechange.trg-learning.com/
The deadline for submission is: January 8, 2018

SEMINAR EXPENSES
The cost of the Seminar is $12,000 US. The fee includes: registration, course materials, instruction, seminar-associated ground travel, one-way airfare from Washington, D.C. to California, food, lodging (two people per room in all locations), and US-based health insurance. The fee does not include: visa fees, travel insurance, or food/lodging before or after the Seminar dates of May 7 -26, 2018. Travel from the country of origin to Washington, D.C., and back home from California is the responsibility of the participant or sponsoring organization and is not included in the course fee.
